- Total sales increased by 12.8% YoY, same-store sales were up 4.6% YoY(DQ format only). We delivered upbeat sales growth with our successful strategies for daily necessities and foods. We also took market share from competitors by leading price competition after the consumption tax-hike.
- GPM improved 0.1 points year on year to 26.8% in 1H, mainly due to the following two reasons.
 - Food sales, which have relatively lower GPM, jumped by about 20% from a year ago. GPM improved because of the better sales in value-added goods.
 - Gross profit increased at a faster pace than sales.
- SGA ratio to the sales were flat although we made the upfront investment, mainly labor cost etc, for the future new store rollout.
OP grew and beat our estimate driven by sales growth. 1H results were all time high.
